

Equipment - Water Trailer

A recommended and very handy piece of equipment to use for application is a tow-behind water trailer:

Tow-behind trailer with tank and pump:

- 2" trailer hitch ball
- Small Pull-start trash pump (this is the only approved kind of pump – won't jam)
- Typically comes with a garden hose and nozzle, which you will need in order to apply mix properly
- 300 – 500 gal tank (typically 500) see examples. Probably the 325 gal Water Dog shown would be ideal, but harder to come by than the standard dual axle 500-gal models.
- Plastic tank with see-thru marking levels, is ideal for:
 - Mixing (just fill in N gallons of water by hose, add your polymer liquid to the water and stir – or add poly at same time as water and should be no need to stir)
 - Application: Note the gallons of mix you want to apply to an area, use the gauge to tell where to stop applying for that area.

(Be sure to flush trailer and pump with water immediately after applying poly to your trail or driveway job)

Available in Seattle from:

Star Rentals (the 500 gal dual axle by Wylie only)

1919 4th Ave S

Seattle, WA 98134

(206) 622-7880

500 Gallon Water Trailer

Water Dog 500 Gallon Fire Hose Hook-up

We have incorporated both a 1 ½ in fire hose adapter and faucet for a standard garden hose. Our 2" Multiquip pump with 4 hp Honda engine will give you the pressure you need for jobs such as equipment wash down, ditch jetting, spraying pads, firefighting, and many more. If you have special high pressure requirements, ask about our optional high pressure pump with 5.5 hp engine.

WYLIE EXP500S

Wylie tow behind 500 gal self-contained water wagon, surge brakes, 2" Tsurumi pump w/Honda engine, adjustable 3 nozzle spray bar, fire hose and nozzle, fenders, lights, and anti-siphon fill kit.
